#### Resources to support your child

All resources available on Teams in the following areas:

- Theory
- Videos

#### Practical Strategies to support your child

- Try to encourage your child to access the teams page or the SQA website as this is where they can access 'how to complete the log book'
- Attend class on a regular basis to help complete the assignment on time
- Ask your child what their strengths are and what areas they need to try developing.
- Ask your child to seek advice and support where required – in class, break/lunch times or after school, email or teams access

#### How can you support your child?

Although there is no written exam your child will still have to complete the Log Book and is all about tools and machinery, on how to use them.

- Help them by asking questions on what they used in class and why they used them. This could be tools and machinery. Make sure they are specific in their answers
